

220 Optical Cable Accessories

AI Overview

220 optical cable accessories include fiber optic cable ends, specialty multimode fibers, and installation tools designed for 220 μm cladding or core fibers.

Fiber Optic Cable Ends For optical cables, TT220 cable ends are commonly used to protect and finish the ends of fiber optic or thin wire cables. These silicone cable ends are available in black, adult size, with a core diameter of 1.3 mm and an overall length of 53 mm. They are sold in pairs and can be slightly modified to fit larger cables if needed. These ends are ideal for applications such as eyeglass temple wires or small-diameter optical cables, providing durability and easy installation.

Specialty Optical Fibers The MM-S200/220-22A is a pure silica core multimode optical fiber designed for compatibility with fiber-coupled diode lasers. It features a 200 μm core and 220 μm cladding, with a numerical aperture of 0.22 ± 0.02 . These fibers are suitable for high-power diode laser delivery, couplers, and pump combiners. They offer excellent geometric uniformity, core/clad concentricity, and are RoHS compliant, making them ideal for precision optical applications.

Fiber Optic Installation Tools Proper installation of 220 optical cables often requires specialized tools. Corning fiber optic accessories include cable prep tools, polishing film, cleaning accessories, splice protection tools, and fiber access tools. These accessories ensure proper handling, termination, and maintenance of optical fibers, improving performance and longevity of the cable system.

Summary When working with 220 optical cables, you may need: Cable ends for protection and finishing (e.g., TT220 silicone ends) Specialty fibers with 200/220 μm core/clad ratios for laser or telecom applications Installation and maintenance tools such as prep kits, cleaning accessories, and splice protection These accessories are essential for ensuring reliable performance, precise alignment, and safe handling of optical fibers in both professional and industrial settings.
