

24-Port SFP Gigabit Switch

AI Overview

Several 24-port gigabit switches with SFP slots are available, including TP-Link TL-SG2424, TL-SG3428, Omada SG3428XF, Netgear GS724T, and D-Link DGS-F1026P-E, offering a mix of Layer 2 management, SFP connectivity, and advanced features.

TP-Link Options

- TL-SG2424:** 24 gigabit RJ45 ports with 4 combo SFP slots. Offers enterprise-level QoS, VLAN support, port mirroring, link aggregation, and storm control. Managed via web interface, CLI, SNMP, and RMON, making it suitable for small to medium businesses requiring cost-effective Layer 2 management.
- TL-SG3428:** 24-port gigabit L2 managed switch with 4 SFP slots. Supports Omada SDN for centralized management, advanced VLAN, QoS, and security features. Ideal for users integrating multiple network devices under Omada software.
- SG3428XF:** 24 SFP ports with 4 10GE SFP+ slots. Designed for 10G multi-gigabit networks with SDN cloud management, allowing remote monitoring and configuration across multiple sites.

Netgear Option

- GS724T:** 24-port gigabit smart cloud switch with 2 dedicated SFP ports. Supports L2/L2+ and Layer 3 Lite features, Insight Cloud Management for remote control, VLANs, QoS, and enhanced network usability. Suitable for businesses needing cloud-managed switches.

D-Link Option

- DGS-F1026P-E:** 24 10/100BASE-TX ports with 2 SFP ports and PoE support (250W total). Plug-and-play design, ideal for surveillance or small office networks. Supports 802.3x flow control to minimize packet loss.

Key Considerations

- SFP vs SFP+:** SFP slots support 1G fiber connections, while SFP+ slots allow 10G uplinks for higher bandwidth requirements.
- Management Features:** Managed switches provide VLANs, QoS, port mirroring, and link aggregation, while smart or unmanaged switches offer simpler setup.
- PoE Support:** If powering devices like IP cameras or access points is needed, consider PoE-enabled models like D-Link DGS-F1026P-E.
- Integration:** Omada switches integrate with SDN platforms for centralized management, useful for multi-site deployment.
