

24-port optical distribution box

Overview

The 24 port fiber optic distribution box provides a protected termination point for feeder cable to connect with drop cable in FTTH and FTTx communication networks. It can. AR-DB-24P-CB It is intended to house and protect optical splices by merging between the trunk cable and the output cables of a terminal optical network. Has fiber reserve system with loose tube and accommodation. This type of ODF is design for large splice tray, excellent armor plate, and has good protection of pigtails. Ideal for FTTH applications, this compact wall-mountable cabinet integrates termination, splicing, and distribution functions in. AZE's Outdoor Fiber Optic Distribution Box is applicable in FTTH project and suitable for building's outer walls application; They can distribute cables after installing splitters and also can draw out room fiber optic cables by direct or cross-connections. They are with the function of mechanical.
