

8-port ODF patch panel

AI Overview

An 8-port ODF patch panel is a compact fiber optic distribution frame designed to manage, protect, and connect up to eight fiber optic cables, suitable for indoor and FTTH applications.

Overview An 8-port ODF (Optical Distribution Frame) patch panel is used to terminate, organize, and protect fiber optic cables in network environments. It is ideal for small to medium network setups, including FTTH (Fiber to the Home), LAN, FTTX, and CATV systems. The panel provides a secure connection for fiber cables and pigtails while allowing efficient cable management and protection for splices and joints.

Features

- Port Capacity:** Supports up to 8 fiber connections, compatible with single-core or duplex connectors.
- Connector Types:** Can accommodate SC, LC, ST, or FC adapters, and hybrid models support both single-mode and multimode fibers.
- Installation:** Lightweight and compact, suitable for wall-mounting, pole-mounting, or integration into 19-inch server racks.
- Protection:** Provides storage for tail fibers, splice trays, and ensures protection against physical damage and environmental factors for indoor models.
- Applications:** Commonly used in telecommunication rooms, data centers, residential buildings, and offices.

Types

- Indoor ODFs:** Designed for controlled environments like offices or data centers; focus on ease of cable management and accessibility.
- Outdoor ODFs:** Weatherproof and durable, suitable for pole-mounted or underground installations.
- Hybrid ODFs:** Support multiple connector types and fiber modes, providing flexibility for diverse network requirements.

Benefits

- Efficient fiber management and organization.
- Scalable for future network expansion.
- Reduces signal loss by protecting splices and connectors.
- Compatible with various fiber optic cables, including ribbon and standard optical cables.

Summary An 8-port ODF patch panel is a versatile and essential component for fiber optic networks, offering secure connections, organized cable management, and protection for fiber splices. It is particularly suitable for FTTH dep...
