

American DAC High-Speed Cable QSFP-DD

Overview

The 400G QSFP-DD Direct Attach Cable (DAC) series provides ultra-high-speed, low-latency connectivity for next-generation data centers, high-performance computing (HPC), and AI/ML clusters. In modern data centers and enterprise networks, Quad Small Form-factor Pluggable (QSFP) cables are everywhere. They connect servers, switches, and storage at speeds from 40G to 400G and beyond. Thanks to their four-lane parallel architecture, QSFP cables combine high bandwidth with compact design. In or between adjacent racks. As a passive cable, it requires no external power, relying on host differential magnetic interference (EMI). Its robust design is ideal for high-performance networking. The plug-and-play functionality simplifies deployment for active optical modules. Available in various lengths, it adapts to. Amphenol's QSFP DD (Quad Small Form Factor Pluggable Double Density) copper cable assemblies double the number of channels from 4 to 8 lanes when compared to the existing QSFP cabling systems, enabling more bandwidth within the same mechanical envelope. QSFPTEK's 400G DAC is fully compliant to.
