

# Anci Steel Cable Tray Price

## AI Overview

Steel cable trays typically cost between \$10 and \$30 per meter, depending on material, type, and finish. Steel cable trays, including those similar to Anc brand, are priced based on several factors such as material quality, coating, size, and supplier margins. Standard galvanized steel trays are the most common and cost-effective, while stainless steel trays offer higher corrosion resistance at a premium price. Aluminum trays are lighter but generally more expensive, ranging from \$20 to \$50 per meter, and plastic trays are the most budget-friendly but less suitable for heavy loads or high-temperature environments (ApexTray) .

**Price Influencing Factors:**

- Material & Coating:** Hot-dip galvanized (HDG) steel is durable and slightly more expensive than pre-galvanized steel. Powder-coated or stainless steel finishes increase longevity and cost (RS Online) .
- Tray Type:** Ladder trays, designed for heavy cables, are more expensive than perforated or wire mesh trays. Wire mesh trays are ideal for lightweight cabling and cost less (ApexTray) .
- Dimensions:** Wider or thicker trays require more material, increasing the price. Load-bearing capacity also affects cost (ApexTray) .
- Order Quantity:** Bulk purchases can reduce per-meter costs by 20–40%, and importing from regions like China may lower costs by 30–50% (ApexTray) .
- Labor & Installation:** Skilled labor and regional wage differences can add to the total cost (ApexTray) .

**Cost-Saving Tips:** Opt for perforated trays instead of ladder trays if heavy load support is not required. Purchase in bulk or negotiate long-term supply contracts. Consider off-peak seasons for better pricing and promotions. For a precise quote on Anc steel cable trays, it is recommended to contact suppliers directly with specifications such as tray type, length, width, and coating requirements, as prices can vary significantly based on these factors (CEF, RS Online)
