

Are fiber optic pigtail prices rising

Overview

From late 2025 into 2026, global fibre optic prices have increased sharply and across the board — standard single-mode, bend-insensitive grades, and in turn pre-terminated assemblies, patch leads, and bulk cable. The global fiber optic industry is entering a new pricing cycle. For distributors, telecom. After years of relative price stability, the bare fiber market entered a sharp upward trajectory starting in late 2024. D) have risen by 40–60% since Q1 2025, with spot market prices doubling in some. Input costs for fiber optic cable are adding upward pressure on fiber optic cable prices at a time when demand for fiber technology is high and expected to continue growing. In some cases, suppliers only guarantee quotations for the same day, and in extreme situations even half-day quotations are appearing in the market. For many professionals who have worked in the optical.
