

Barbados EPON device 10G

Overview

The 10G PON OLT can provide a maximum bandwidth of 10Gbps downstream and 10Gbps upstream for the ONU. · Long distance access It can support a transmission distance up to 20km. · Simultaneous access to multiple services such as broadband internet, IPTV, and VoIP (Internet telephony). These printers, featuring PrecisionCore printheads that deliver sharp text and vibrant colours while optimising ink consumption, are designed for everyday use. With. Cisco's family of 10-Gbps symmetrical passive optical network (XGS-PON) Optical Network Terminals (ONTs) delivers flexible, high-performance broadband connectivity for a wide range of fiber-to-the-premises use cases, including residential spaces, Multidwelling Units (MDUs), Small Office/Home Office. With 8 PON ports, this OLT accommodates high bandwidth demands, making it ideal for providers to efficiently serve multiple users without compromising performance. Supports 10G uplink functionality, allowing for faster data transfer rates, enhanced network performance, and scalability to meet. We have been providing advanced broadband technology and internet access equipment to the market. We offer 1G-EPON (Ethernet passive optical network) cards, 10G-EPON cards, and. ET900 series 10G PON ONU devices are corridor-side equipment for the H3C FTTB solution.
