

Bimetallic Cable Tray Prices

AI Overview

Custom bimetallic cable tray prices vary widely, typically ranging from \$2 to \$25 per meter depending on material, size, coating, and order quantity.

Price Range and Factors

The cost of custom bimetallic cable trays depends on several key factors:

- Material Composition:** Bimetallic trays combine two metals, often for enhanced corrosion resistance and strength. Galvanized steel is common and cost-effective, while stainless steel or aluminum layers increase durability and price.
- Tray Type:** Ladder, perforated, or solid trays differ in cost. Ladder trays support heavier cables and are more expensive, while perforated trays are lighter and cheaper.
- Coating and Finish:** Hot-dip galvanization, powder coating, or pre-galvanized finishes affect both longevity and price. HDG is more durable but costs more upfront.
- Dimensions and Customization:** Height, width, and length adjustments, as well as T-branches or angled sections, influence pricing. Custom designs require precise specifications for accurate quotes.
- Order Quantity:** Bulk orders often reduce per-meter costs, while small or one-off orders may be priced higher.
- Additional Costs:** Shipping, installation, and local labor rates can add to the total project cost.
- Supplier Practices:** Manufacturers like those on Alibaba or TradeWheel offer customized solutions and can provide free samples (excluding freight). Prices are not fixed and require formal quotations based on exact size and quantity. Suppliers typically serve industrial, commercial, and infrastructure projects, including data centers, hospitals, and metro systems.

Cost-Saving Tips

- Opt for perforated trays instead of ladder trays if weight is not a concern, potentially saving 15% or more.
- Consider bulk purchasing to reduce unit costs.
- Evaluate coating options based on environmental exposure to balance durability and upfront cost.

In summary, custom bimetallic cable tray pricing is highly variable, and obtaining a precise quote requires specifying material, dimensions, coating, and quantity. For a rough estimate, expect \$2–\$25 per meter,...
