

Burundi Fiber Optic Broadband

Overview

Key Insight: Burundi has made significant progress in expanding its fiber optic infrastructure, reaching 45% coverage in urban regions, which supports faster internet access. The growth of internet users has increased steadily, with 38% of the population actively online, driven by mobile technology. The World Wide Web is the new backbone of communication, business, education, and innovation across Africa. As a result, several states in the continent are actively embracing digital solutions. As of January 2025, Burundi had about 1.78 million internet users, roughly 12.3% of homes wired and only about 3,000 fixed. EU Support to Africa's National Broadband Mapping Systems (Africa-BB-Maps) Africa-BB-Maps Questionnaire Report-BURUNDI 26-27 March, Abidjan, Cote d'Ivoire Dr Samuel MUHIZI, Director General of ARCT PICTURE Introduction Burundi (pronounced: the Republic of Burundi) is a landlocked African country. Burundi Backbone System, or BBS, is a wholesale broadband telecommunications company in Burundi. BBS specializes in design, construction and operation of very high speed networks. BBS. AITAF provides end-to-end optical communication solutions, structured cabling, ODN, optical modules, fiber testing instruments, data center networks, base station energy, smart city communications.
