

CIF export price of rack-mounted lithium battery cabinet with anti-tracking function for Monaco

AI Overview

The estimated CIF export price for a rack-mounted lithium battery cabinet with anti-tracking function is approximately USD 43,000–44,000 per set. Price Overview Based on recent global trade data, rack-mounted lithium battery cabinets (UN3481, lithium-ion batteries contained in equipment, Class 9) are typically exported at a CIF price of around USD 43,080 per set. This price includes the cost of the product, insurance, and freight to the destination port, which in this case would be Monaco. Supplier and Sourcing Options German manufacturers and exporters are commonly listed for these battery cabinets, offering 380V models with anti-tracking features. B2B marketplaces such as Europages provide direct contact with wholesalers and manufacturers, allowing buyers to negotiate CIF terms and confirm shipping logistics. Platforms like Cybex Exim and Eximpedia provide verified trade intelligence, including shipment values, HS codes, and exporter-importer details, which can help identify reliable suppliers for Monaco. Considerations for Monaco Monaco imports are typically handled via nearby French ports such as Nice or Marseille, which may slightly affect CIF pricing due to local port fees and insurance. Ensure compliance with UN3481 lithium battery regulations and anti-tracking certification requirements for safe transport. Shipping costs may vary depending on container size, weight, and insurance coverage, so the CIF price should be confirmed with the supplier before finalizing the order. Recommendation For accurate budgeting and procurement, it is advisable to contact multiple German or European suppliers directly through B2B platforms, request CIF quotes to Monaco, and verify the inclusion of anti-tracking fu...
