

Communications Australia

AI Overview

Communications Australia refers to both a private company delivering specialized communications solutions and the broader communications and media landscape regulated and supported by industry bodies in Australia. Communications Australia (Company) Founded in 1994, Communications Australia is an Australian-owned company based in Mulgrave, Victoria. It specializes in providing engineering and technical communications solutions across sectors such as resources and mining, banking, finance, insurance, healthcare, education, government, manufacturing, and transportation. The company emphasizes consultancy, technologically advanced practices, and long-term partnerships, employing a skilled workforce to deliver services in unified communications, two-way radio, contact centers, data networking, and professional services.

Communications and Media in Australia The Australian Communications and Media Authority (ACMA) is the independent statutory body regulating communications and media services in Australia. ACMA oversees telecommunications, broadcasting, and radiocommunications, ensuring compliance with laws, protecting consumers, and promoting economic and social benefits from communications infrastructure and services. ACMA also conducts research and publishes reports on trends, consumer behavior, and industry developments, providing insights into how Australians connect, interact, and engage with digital media.

Industry Associations Communication and Public Relations Australia (CPRA) is the peak professional body for communications and PR professionals. It offers training, networking, and recognition programs, supporting professionals across corporate, government, education, and not-for-profit sectors.

Australian Telecommunications Alliance (ATA), formerly Communications Alliance, is the peak industry body for telecommunications. It develops industry codes, technical standards, and guidelines, working closely with ACMA to ensure compliance and pro...
