

Complete List of Network Distribution Box Models

AI Overview

Popular network distribution box models include Cisco Catalyst and Meraki switches, as well as RUCKUS ICX series switches, designed for scalable and secure network distribution.

Cisco Network Distribution Boxes Cisco offers a range of Campus LAN core and distribution switches suitable for enterprise networks. Key models include:

- Cisco Catalyst 9000 Series:** High-performance, secure, and scalable switches for campus and branch networks.
- Cisco Meraki MS Series:** Cloud-managed switches with simplified deployment, monitoring, and security features. These switches are designed for high throughput, advanced security, and intelligent network management, making them suitable for both core and distribution layers in enterprise networks.

RUCKUS Network Distribution Boxes RUCKUS provides the ICX family of Ethernet switches, which are fixed form-factor switches with robust performance and stacking capabilities. Notable models include:

- ICX 7150 Series:** Compact, low-latency switches for access and distribution layers.
- ICX 7250 Series:** High-performance switches with advanced stacking and long-distance fiber support.
- ICX 7450 Series:** Enterprise-grade switches for core and distribution networks with high scalability.

RUCKUS ICX switches integrate with RUCKUS SmartZone controllers, One cloud platform, and Unleashed solutions, enabling unified management of wired and wireless networks.

Key Features to Consider

- Stacking Technology:** Both Cisco and RUCKUS switches support stacking, allowing multiple switches to operate as a single logical system.
- Scalability:** Designed to handle growing network demands with high throughput and low latency.
- Integration:** Seamless integration with wireless access points and centralized management platforms.
- Security:** Advanced security features to protect enterprise networks from threats.

These models represent the most widely used network distri...
