

Comprehensive Unit Price of Aerial Optical Cable for Communication

Rear of the optical fiber distribution box

AI Overview

Aerial optical fiber cables typically cost between \$2,900 and \$4,200 per mile, with installation averaging \$8-12 per linear foot depending on cable type and core count.

Pricing Overview The cost of aerial fiber optic cables varies based on cable type, core count, span length, and installation environment. Standard G.652.D cables range from \$2,900 per mile for bulk orders (10+ miles) to \$4,200 per mile for single-mile purchases. Installation costs, which include labor and suspension hardware, average \$8-12 per linear foot, translating to \$42,240-\$63,360 per mile. Higher core counts, such as 144-core cables, can command up to 60% higher prices than 48-core equivalents.

Types of Aerial Optical Cables

- ADSS (All-Dielectric Self-Supporting) Cables** Contain integral strength members, requiring no separate messenger wire. Pricing example: 12-core short-span ADSS cable costs \$0.25-\$0.35 per meter, while 48-core long-span cables may cost \$0.90-\$1.20 per meter. Ideal for long spans (>100 meters) and power grid or telecom projects.
- Catenary or Messenger-Supported Cables** Fiber strands are attached to an external steel messenger wire. Variants include figure-8 cables with integrated messengers and lashed cables. Suitable for dense urban grids where cost optimization is important.
- Armored Aerial Cables** Reinforced with metallic or non-metallic armor for protection against physical damage, rodents, or vandalism. Common in industrial zones or high-traffic areas.
- Specialty Cables** Ultra-slim, flat-profile cables for last-mile FTTH deployments. Dual-rated cables for seamless outdoor-to-indoor transitions, combining weather resistance with fire-retardant properties.

Factors Affecting Price

- Core count:** More cores increase material and manufacturing costs.
- Cable span and tensile requirements:** Longer spans or higher mechanical loads require reinforced structure...
