

El Salvador Arched Bridge

Overview

Pedelta designed an arch bridge over the Torola River, in northern El Salvador. This structure is necessary to cross the future reservoir created by El Chaparral Hydroelectric Plant, which is currently under construction. The project comprised the detailed structural design and analysis of the arch. In a festive gathering with local communities, President Nayib Bukele inaugurated the San Antonio del Mosco and Carolina bridges in San Miguel, two major infrastructure projects built over the Torola River. "A couple of years ago we came to lay the first stone. It is notable for being the first bridge of its kind in the country and for its modern architectural design, conceived to facilitate both vehicular and.
