

Fiber Optic Connector LCSC Connector

AI Overview

LCSC offers a range of fiber optic connectors, including LC, SC, ST, and FC types, suitable for high-density and general networking applications.

Overview of Fiber Optic Connectors

Fiber optic connectors are mechanical devices that align and join optical fibers, allowing light to pass with minimal insertion loss and reflection. They are widely used in telecom networks, data centers, CATV, and optical distribution frames. Connectors enable easy connection and disconnection, unlike permanent splicing, making them ideal for maintenance and flexible network configurations.

LC Connectors

Ferrule Size: 1.25 mm, smaller than SC connectors, allowing high-density installations.

Locking Mechanism: Push-pull latch similar to an RJ45 plug, providing secure connections in tight spaces.

Applications: Dominant in SFP/SFP+ and QSFP transceivers, duplex channels, and high-density patch panels. LC-APC variants are used in PON backbones and test leads requiring very low return loss.

Advantages: Compact footprint, reliable mechanical stability, and suitable for modern high-density network environments.

SC Connectors

Ferrule Size: 2.5 mm, square snap-in housing.

Applications: Common in enterprise networks, FTTH, and CATV. SC/APC connectors are preferred where low return loss is critical.

Advantages: Easy plug-in design, good mechanical stability, and cost-effective.

Other Connector Types

ST Connectors: Round body with bayonet-style lock, mainly used in legacy and industrial networks.

FC Connectors: Round, metal body with screw-threaded connection, ideal for telecom systems and high-vibration environments.

LCSC Product Availability

LCSC Electronics provides a variety of fiber optic connectors, including LC, SC, ST, and FC types, along with Asian domestic alternatives. Products are suitable for single-mode and multimode fibers, with options for UPC or APC polish, and different cable geometries (simplex/duplex, 0.9/2.0/3.0 mm) to match device ports and optical budgets.

Best Practices

Cleaning: Use a fiber-cleaning pen or alcohol-soaked lint-free wipes; avoid...
