

Fiber optic aggregation switch with 24 optical ports

Overview

Aggregation switch for small and medium-sized campus networks, with 8 x 1GE/10GE SFP+ uplink ports for high-speed data transmission; 24 x 1GE SFP ports (including 8 x combo ports), providing high-speed network experience for long-distance services. The S5300-24S8T6X is a Ethernet-managed aggregation switch with 24x GE SFP ports, 8x GE RJ45, and 6x 10GE SFP+ uplink ports, supporting a switching capacity of up to 184 Gbps and a forwarding rate of 138 Mpps, for stable transmission. Perfect security control policy and CPU protect policy improve fault tolerance and ensure stable network operation and link. The DXS-3400 Series switches feature a modular fan and power supply design for a high availability architecture. The hot-swappable design means that fans and power supplies can be replaced without affecting switch operation. Physical and virtual switch stacking allow the switches to be managed from. Cisco MDS 9124V 64-Gbps 24-Port Fibre Channel switch brings the latest high-performance, low-latency Fibre Channel Storage Area Network (SAN) technology to market. Core switch for small and medium-sized enterprise.
