

Fiber optic cabinet pigtail cable management price

AI Overview

Fiber optic cabinets with pigtail cable management typically range from \$50 for small wall-mounted enclosures to several hundred dollars for high-capacity distribution cabinets.

Price Overview

Small Wall-Mount Enclosures (6–12 ports): Kits like the SC SM 6-port wall mount fiber enclosure with pigtails are available for around \$50–\$100. These include color-coded pigtails, SC couplers, and basic cable management for indoor use, suitable for data centers or small LAN installations (Amazon).

Medium Wall-Mount Enclosures (24–48 ports): Units such as the Polyphaser PP-WM48SC with 48 SC/UPC pigtails, splice trays, and cable management guides are priced in the \$150–\$300 range, depending on brand and included accessories. These enclosures support higher-density fiber management and maintain proper bend radius for optical performance.

High-Capacity Distribution Cabinets (144–288 cores): Larger fiber distribution cabinets for FTTH or PON networks, like the YFDC-288A or 144-core ODF units, are more expensive, typically \$500–\$1,000+, depending on configuration, material, and included pigtail management features. These cabinets provide extensive routing, splicing, and storage for pigtails, suitable for telecom or large enterprise networks.

Factors Affecting Price

Port Count and Capacity: More ports and higher core counts increase cost.

Included Accessories: Splice trays, couplers, and cable guides add value.

Material and Build Quality: Steel or cold-rolled enclosures are more durable and costlier.

Connector Type: SC, LC, or APC connectors may influence price.

Brand and Certification: Products with UL, CE, or RoHS compliance may be priced higher.

Summary

For small-scale installations, expect to pay \$50–\$100 for a basic wall-mount pigtail enclosure. Medium-density enclosures with 24–48 ports range from \$150–\$300, while high-capacity cabinets for 144–288 cores can cost \$5...
