

Fireproof cable tray fire protection time

Overview

30 minutes hydrocarbon fire protection to cable trays carrying control cable wiring. The FireMaster® cable tray wrap consists of FireMaster® Marine Plus blanket fully encapsulated in aluminium foil supplied and in a roll form. Fire resistance testing involves different methods to evaluate safety performance. The sample is exposed to direct flames. Fire Rating: Up To EI120 (240 minutes integrity, 120 minutes insulation) Fire Attack: Both Sides Cable Load (max): 24kg/lm 40 Year. Where cables pass through shafts, walls, slabs, or enter electrical panels or cabinets, openings shall be tightly sealed with firestopping materials in accordance with design requirements. Process flow: reserved openings → busway installation → distribution box positioning and installation →. Our tested solutions for cable fire protection can delay the spread of fire in order to minimise the damage sustained. 7 products are successfully used to protect cables in high-rise buildings. The resulting barrier retards the transmission of smoke, fire, and toxic gases from spreading between adjacent rooms and floors for the rated time period.
