

German Tray Cable Tray Models and Prices

AI Overview

The price of German tray-type cable trays varies widely depending on material, size, load capacity, and manufacturer, typically ranging from €20 to €150 per meter for standard industrial trays.

Factors Affecting Price

Material: Cable trays are commonly made from hot-dip galvanized steel, stainless steel, or halogen-free plastic. Stainless steel trays are more expensive due to corrosion resistance, while plastic trays are generally cheaper but suitable for lighter loads and indoor use.

Type and Design: Tray types include solid, perforated, and ladder-style trays. Ladder trays, designed for heavy power cables, are usually more expensive than perforated or solid trays due to higher material usage and structural strength.

Dimensions and Load Capacity: Widths range from 35 mm to 600 mm, and heights from 30 mm to 110 mm. Larger trays with higher load ratings cost more, as they require thicker sheet metal and stronger support structures.

Standards Compliance: German cable trays comply with DIN EN 61537 and international standards. Trays certified for industrial or outdoor use, or with special coatings for chemical or marine environments, command higher prices.

Manufacturer and Brand: Leading German manufacturers include Pohlcon, Duelco, Rosenberger-OSI, TKD Kabel, and WDM Deutenberg. Premium brands with advanced modular systems or custom solutions may charge a premium for quality, durability, and technical support.

Typical Price Ranges

- Plastic or halogen-free trays: €20–€50 per meter
- Standard galvanized steel trays: €40–€90 per meter
- Stainless steel or heavy-duty ladder trays: €100–€150+ per meter

Prices may vary based on bulk orders, shipping, and additional accessories such as bends, junctions, and mounting hardware. For precise pricing, contacting suppliers like Ekabel24, Pohlcon, or WDM Deutenberg is recommended, as they can provide quotes tailored to specific dimensions.
