

Gyta 4-core optical cable price

AI Overview

A 4-core GYTA optical fiber cable typically costs between \$0.50 and \$2.50 per meter, depending on specifications, quantity, and supplier.

Price Overview The cost of a 4-core GYTA optical cable varies based on factors such as fiber type (single-mode or multi-mode), armored or unarmored construction, outdoor or indoor rating, and purchase volume. For example, suppliers like Kaichuang Tong sell single-mode outdoor GYTA-4 core cables with steel wire armor by the meter, often requiring a minimum order of 1000 meters. Wholesale platforms like Alibaba list similar cables, where bulk orders can reduce the per-meter price.

Factors Affecting Cost

- Fiber Type:** Single-mode fibers are generally more expensive than multi-mode fibers due to longer-distance transmission capabilities.
- Armoring and Sheathing:** Steel wire armored cables for outdoor use cost more than unarmored indoor cables because of enhanced mechanical protection and weather resistance.
- Length and Minimum Order:** Suppliers often set minimum order quantities (e.g., 1000 meters), which affects the total cost and per-meter pricing.
- Supplier and Shipping:** Prices vary by manufacturer, country of origin, and shipping costs. International suppliers may offer lower unit prices but higher shipping fees.

Typical Market Range

- Low-end:** Around \$0.50–\$1.00 per meter for basic unarmored single-mode 4-core GYTA cable.
- Mid-range:** \$1.00–\$2.00 per meter for armored outdoor single-mode cables suitable for duct or direct burial installation.
- High-end:** \$2.00–\$2.50 per meter for premium armored cables with additional UV, moisture, and mechanical protection.

For accurate pricing, it is recommended to contact suppliers directly for a quotation based on your required length, specifications, and delivery location, as prices fluctuate with market demand and order volume.
