

Household distribution box 36

AI Overview

A household distribution box 36 is an electrical panel designed to house 36 standard modules for safe power distribution in residential or commercial settings.

Overview

A 36-module distribution box is typically used to organize circuit breakers, residual current devices (RCDs), and other electrical modules in a compact, standardized enclosure. These boxes are designed to comply with international standards such as IEC60670-24 and DIN rail specifications, ensuring safe and reliable installation.

Types and Mounting

Flush-mounted boxes: Installed within walls for a clean, integrated look. Example: Hager VU36NE, suitable for residential and commercial systems, designed for easy integration and durability.

Surface-mounted boxes: Mounted directly on walls, often made of robust ABS plastic with transparent doors for module protection. Example: ELEKTRO-PLAST Rn36, IP40 protection, temperature resistance from -25°C to +60°C, and shock resistance IK07.

Wet-room boxes: Designed for damp environments with IP65 protection, made from weather-resistant ASA material, allowing visual inspection without opening the door. Example: DISBOX-F series.

Key Features

Module capacity: 36 modules, often arranged in 3 rows of 12 modules each (3x12 configuration).

Material: High-quality ABS or ASA plastic for durability and impact resistance.

Protection class: IP40 for standard indoor use, IP65 for wet or damp rooms.

DIN rail compatibility: Standard 35x7mm DIN rails for mounting modules.

Voltage and current rating: Typically 240/415V, maximum 100A.

Doors and labeling: Transparent or tinted doors for visual inspection, with adhesive labels for module identification.

Installation Considerations

Ensure proper mounting type (flush or surface) based on wall structure and aesthetic preference. Verify IP rating according to the environment (IP40 for dry indoor, IP65 for wet rooms). Use appropriate screws and fixings; some models require pre-drilled holes or metric pre-stamping for cable glands. Confirm compatibility with standard 18mm wide module...
