

How much does galvanized cloth cable tray cost in Taiwan

AI Overview

The cost of galvanized cable trays in Taiwan varies widely depending on size, type, and finish, typically ranging from \$15 to \$50 USD per meter, with exact pricing available from suppliers upon request.

Factors Affecting Cost

Material and Finish: Galvanized steel is commonly used for durability and corrosion resistance. Hot-dip galvanized trays are generally more expensive than electro-galvanized options due to longer lifespan and superior corrosion protection.

Tray Type: Ladder-type, perforated, and wire mesh cable trays differ in manufacturing complexity. Ladder-type trays are often more robust and slightly higher in cost, while wire mesh trays are lighter and more cost-effective.

Dimensions and Load Capacity: Wider trays or those designed to carry heavier loads cost more. Custom sizes or specialized designs for industrial applications, such as nuclear or high-voltage installations, can increase the price.

Supplier and Volume: Bulk orders from manufacturers in Taiwan can reduce per-meter costs. Local suppliers like Brilltech Engineers and ESZ Company offer customization and export services, and prices are typically provided via direct quotation.

Typical Price Range

Wire mesh galvanized trays: Approximately \$15-\$25 USD per meter, suitable for light to medium cable loads.

Ladder-type or heavy-duty trays: Approximately \$30-\$50 USD per meter, designed for industrial or high-capacity installations.

Custom or specialized trays: Prices vary significantly and require direct supplier consultation for accurate quotes.

How to Obtain Accurate Pricing

To get precise costs for your project in Taiwan:

- Contact local suppliers directly for a custom quote based on tray type, dimensions, and quantity.
- Specify the finish (hot-dip or electro-galvanized) and any special requirements such as fire resistance or high load capacity.
- Consider shipping and installation costs, which may affect the total projec...
