How to thread cables through a 50mm cable tray

Overview

Thread hex nut 25 mm (1") to 50 mm (2") above location of the tray bottom. The cross member comes next followed by a second set of square washers. All vertical hangers will project through the cross member. We recognize the need for a complete cable tray reference source for electrical engineers and designers. Therefore, sufficient size holes will have to be punched or drilled. This guide covers the critical steps, from selecting the right electrical cable tray and performing accurate cable fill calculations to managing a safe cable pull through and ensuring all bonding and grounding requirements are met. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. maintain spacing or to keep cables in place when the tray is ect the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. ystems support and route all types of cables.
