

Huawei Single-Mode Optical Module Gigabit 10km

Overview

The Huawei OSX010000 is a carrier-grade SFP+ optical transceiver designed for 10G backbone and aggregation links. Delivering 10 Gbit/s over single-mode fiber at a 1310 nm center wavelength, this 10GBASE-LR module supports links up to 10 km with LC connectors. If the SFP-10G-ER-1310 is connected to a 10Gbase-ER standard optical module (1550nm, 10GE, 40km), the maximum transmission distance is only 20km due to different specifications such as wavelength and receiving sensitivity. Single-fiber bidirectional (BIDI) optical modules must be used in pairs. For. This document provides an overall description of the CE12800 series switches hardware, helping you obtain detailed information about each chassis, power module, fan module, card, cable, and pluggable modules for interface. 652 fiber with LC connectivity. With a transmit power range of -8.
