

Is it a good idea to mount the router s fiber optic cable on the wall for storage

Overview

A wall mount fiber enclosure provides a secure, organized place for your fiber optic cables. It also helps protect the cables from physical damage, dust, and other environmental factors, enhancing your network's performance and longevity. It's the router's job to distribute data from phone lines and fibre optic cables around our homes, to devices as diverse as smart speakers, security cameras and wearable fitness trackers. I've been doing some research on the internet and every article/video shows the router placed with the antennas at the top or side, which means the ports. Running fiber internally involves extending this high-speed link from the service entry point to a centralized location, such as a dedicated media closet or network rack. This DIY effort is undertaken to maximize performance, improve aesthetics, or relocate the Optical Network Terminal (ONT) to a. It is essentially a box designed to house and protect the fiber optic cables, which are delicate and crucial components of your network system. Asus RT-66 router in basement Dell 24 port Gigabit switch in basement. Ethernet cables from that run up to family.
