

Jamaica QSFP optical module QSFP28

Overview

Our QSFP28-SR Multi-Mode-Fiber (MMF) Optical Modules integrate a 12-lane MTP/MPO fiber receptacle (port) for 100G Ethernet links using industry-standard MTP/MPO fiber patch cords up to 100-meters in length. Our QSFP28-LR Single Mode Fiber (SMF) Module supports OS1 Duplex. At the center of this transition is QSFP28, a compact, high-performance optical transceiver form factor designed specifically for 100-gigabit data rates. QSFP28 (Quad Small Form-Factor Pluggable 28) enables 100G transmission by aggregating four parallel 25G electrical lanes, delivering an optimal. FS offers a growing portfolio of 100G QSFP28 modules. The 100G QSFP28 module solution provides high-performance 100GbE connectivity for data centres, enterprise core & distribution layers, computing networks and service provider applications. Click to get your 100GbE transceiver modules from nearby. The QSFP-100G modules are our latest generation of 100G transceiver modules solution based on a QSFP form factor. ● Hot-swappable input/output device that plugs into a 100G Gigabit Ethernet Cisco QSFP port. It is NOT supported for use over OM1/OM2 quality fiber.
