- Resolution Support:** Many modern KVM switches support up to 4K@30Hz or 4K@60Hz, ensuring high-quality video on both displays (CKL KVM supports 4K@30Hz).
- USB Sharing:** Typically includes USB 2.0 or 3.0 ports to share keyboards, mice, and other peripherals between devices.
- Audio Support:** Some models provide separate audio and microphone outputs for each monitor.
- Switching Methods:** Options include hotkey switching, front-panel buttons, mouse click switching, or wired remote control.
- EDID Management:** Automatic EDID handling ensures the monitors receive compatible video signals without manual configuration.
- HDCP Compatibility:** Supports HDCP 2.2 for protected content from streaming services like Netflix or Prime Video.
