

Latest Price List for Optical Cable Equipment

AI Overview

Optical cable prices in 2026 vary widely depending on fiber type, installation, and production equipment, ranging from \$0.09–\$6 per foot for materials and \$750,000–\$2.5 million for production lines.

Fiber Optic Cable Material Prices

Single-mode fiber: \$0.10–\$0.50 per foot for the cable itself, with G.652D fiber in China recently surging from 18 RMB/km in early January 2026 to significantly higher levels by March due to tight supply.

Multimode fiber: \$0.30–\$1.00 per foot, with higher strand counts increasing costs proportionally (e.g., 12-strand ≈ \$0.50/ft, 24-strand ≈ \$1.00/ft).

Armored or outdoor cables: \$0.50–\$5 per foot depending on construction and burial requirements.

Pre-terminated assemblies and patch cables: Higher costs due to factory termination and connector type.

Bulk purchases can reduce per-foot costs by 20–40% compared to retail quantities.

Installation and Project Costs

Indoor single-mode run (1,000 ft): Cable \$0.40/ft, labor \$1.00/ft, permits \$150, accessories \$100; total ≈ \$2,650–\$3,100.

Outdoor run with conduit (2,000 ft): Cable \$0.70/ft, labor \$1.60/ft, permits \$350, delivery \$120, accessories \$250; total ≈ \$4,940–\$6,120.

Premium outdoor armored run (5,000 ft): Cable \$1.00/ft, labor \$3.00/ft, permits \$900, delivery \$350; total ≈ \$11,000–\$14,500.

Costs vary by region, labor rates, permitting, and project complexity, with urban areas typically higher than rural areas.

Production Line Equipment Costs

Total investment for a fiber optic cable production line: \$750,000–\$2,500,000+, depending on capacity, automation, and brand.

Break-even production: Approximately 800–1,200 km of cable per month.

Key cost drivers: Core machinery (50–60% of total), automation level, brand origin, installation, setup, training, and initial working capital.

Fully automated lines reduce labor costs but require higher upfront investment, while equipment from established European bra...
