

Libyan Optoelectronic Hybrid Cable LPO

Overview

This 8,700-kilometre fibre-optic network, encompassing 24 fibre pairs and a capacity of 20 terabits per second per pair, is set to connect 11 countries across the Mediterranean, including Libya, by the end of 2025. Libya has formally integrated into the Medusa subsea cable system, marking a pivotal advancement in its telecommunications infrastructure. To overcome these limitations, a new generation of. Leveraging cutting-edge optical engine technology, Lyntera provides high-speed, high-density, and low-power optical interconnect solutions for AI clusters and data centers. Lyntera specializes in data center optical interconnects, and, relying on silicon photonics engine technology developed in. An LPO (Linear Pluggable Optics) solution offers considerable power savings for optical interconnect by removing the digital signal processing (DSP) function from the pluggable optical module. This architecture takes advantage of the capabilities in each segment of the link to form a power, cost. The development of the strategic plan for the holding company and group companies aligns with the vision of the Libyan Holding Company LDT 2030. Work is underway through several workshops with stakeholders.
