

List of Safety Distribution Box Models

AI Overview

Safety distribution boxes come in various models including surface-mounted, flush-mounted, pole-mounted, single-phase, three-phase, lighting, power, control, and smart DB boxes.

Common Distribution Box Models and Types

- Surface-Mounted Distribution Boxes** – Installed directly on walls, suitable for retrofits, industrial, and commercial environments, offering easy access for maintenance and upgrades.
- Flush-Mounted Distribution Boxes** – Embedded into walls for a clean, aesthetic appearance, commonly used in residential and commercial buildings.
- Pole-Mounted Distribution Boxes** – Designed for outdoor applications such as street lighting, utility networks, and remote installations.
- Single-Phase DB Boxes** – Ideal for residential properties and small commercial loads, providing power to lights, fans, and small appliances.
- Three-Phase DB Boxes** – Used in industrial and large commercial facilities requiring higher power capacity, suitable for heavy machinery and large equipment.
- Lighting Distribution Boxes** – Dedicated to managing lighting circuits with protective devices for safety and efficiency.
- Power Distribution Boxes** – Support sockets, equipment, and heavy machinery, ensuring overload and short-circuit protection.
- Control Distribution Boxes** – Integrate control components such as relays, contactors, and timers for automation and industrial control systems.
- Main Distribution Boards (MDBs)** – Central hubs for multiple circuits, often used in large buildings and factories, with robust steel or aluminum enclosures and circuit breakers for safety.
- Fuse Boxes** – Simple protective boxes using fuses to prevent overloads, commonly found in older residential setups.
- Transfer Switch Panels** – Allow switching between main power and backup generators, essential for critical facilities like hospitals and data centers.
- Main Lug Panels** – Sub-panels without a main breaker, connected to a main panel, suitable for expanding electrical systems in large buildings.
- Smart Distribution Boxes** – Equipped with monitoring features to track energy usage, detect faults, and integra...
