

Lithuanian Gyta Optical Cable

Overview

These aluminum tape armored cables GYTA are suitable for installation for long haul communication and LANs, especially suitable for the situation of high requirements of moisture resistance. GYTA is the stranded loose tube fiber optic cable with compact structure; the. The GYTA optical cable is a type of fiber optic cable that is widely used in telecommunication networks. It is known for its high tensile strength, high flexibility, and excellent transmission performance. In this article, we will discuss the characteristics of the GYTA optical cable. It is widely used in high-demand environments due to its superior moisture resistance and. Direct buried cable can be buried directly ground in a trench or using a vibratory with great water-blocking and moisture-proof performance, it also has good crushing performance.
