

New Material Cable Tray Accessories

AI Overview

Cable tray accessories are essential components made from materials like steel, stainless steel, aluminum, and coated metals, designed to support, connect, and protect cables in various installations.

Types of Cable Tray Accessories

Cable tray accessories include a wide range of components that enhance the functionality and safety of cable tray systems:

- Connectors and Couplers:** Used to join sections of cable trays, including gutter connectors and connecting plates, ensuring structural continuity and alignment.
- Separating Strips and Protective Rings:** Provide insulation and protection for cables, preventing abrasion and electrical interference.
- Hangers and Supports:** Brackets and hangers support horizontal or vertical runs of cable trays, securing them to walls, ceilings, or other structures.
- Fittings for Directional Changes:** Tees, crosses, elbows, and bends allow cables to navigate around obstacles or change direction within the tray system.
- Covers and Solid/Perforated Bottoms:** Protect cables from dust, water, and mechanical damage, with solid-bottom trays offering maximum protection and ventilated trays allowing airflow.

Materials and Coatings

Cable tray accessories are manufactured from various materials to suit different environments and load requirements:

- Steel:** Commonly used for general applications, available in pre-galvanized or hot-dip galvanized finishes for corrosion resistance.
- Stainless Steel:** Ideal for corrosive or marine environments, providing durability and long-term reliability.
- Aluminum:** Lightweight and corrosion-resistant, suitable for installations where weight reduction is important.
- Coated Metals:** Optional coatings enhance resistance to moisture, chemicals, or extreme temperatures.

Standards and Compliance

High-quality cable tray accessories comply with international standards to ensure safety and performance: BS EN 61537:2023 and NEMA standards for fabrication and finishes. CENELEC EN 50173-1, EIA/ITA 568 A, and ISO/IEC 11801-1:2017 for cabling and installation standards.
