

Number of data center racks in Tanzania

AI Overview

Tanzania has 11 operational data centers, with a growing number of data center racks driven by increasing demand for digital infrastructure. Tanzania currently hosts 11 data centers operated by multiple providers across the country. While the exact total number of racks is not publicly disclosed, the Tanzania Data Center Rack Market has been expanding steadily, with a compound annual growth rate (CAGR) of 11.62% from 2020 to 2024 and continued growth in 2025. This growth is fueled by rising demand for IT, telecommunications, healthcare, and government data storage solutions, as well as cloud adoption and digital transformation initiatives.

Market Trends and Rack Deployment

Imports and Supply: Key rack imports come from China, South Africa, the United Kingdom, Finland, and India, reflecting a consolidated market with international players.

Rack Types: Modern data centers in Tanzania are increasingly adopting modular, scalable, and energy-efficient racks to accommodate growing data volumes and ensure sustainability.

New Facilities: The upcoming Raxio Tanzania Tier III data center, set to launch in 2026, will add significant colocation capacity and high-performance racks to the market.

Implications

The combination of existing facilities and new developments indicates that Tanzania's rack capacity is expanding rapidly, though precise numbers are proprietary to operators. Businesses and investors can expect flexible, scalable rack solutions to meet the increasing demand for secure and reliable data storage. In summary, while Tanzania has 11 data centers, the number of racks is growing steadily due to imports, new facilities, and digital adoption trends, reflecting a dynamic and expanding data center infrastructure in the country.
