

Offshore Price Guaranteed Polarization Fiber OM4

AI Overview

Offshore-grade OM4 fiber optic cables are available in armored, tight-buffered designs, offering high bandwidth, durability, and compliance with marine standards, with prices ranging from \$4.50 to \$13.50 per foot depending on specifications.

Key Features

- OM4 Fiber Performance** OM4 is a laser-optimized multimode fiber (50/125 μm) designed for high-speed networks, supporting 40G/100G cabling over longer distances than OM3, with low attenuation and high bandwidth performance. It is suitable for polarization-sensitive applications, ensuring reliable signal integrity in demanding environments.
- Offshore and Marine Specifications** For offshore use, cables like the AICI OM4 50/125 armoured tight-buffered fiber are designed for rigs, ships, and yachts. These cables feature:
 - Armored steel braid for mechanical protection and easy installation in restricted areas
 - Tight-buffered construction for fast termination without splicing
 - Marine-grade sheath compounds compliant with IEC 60092-359
 - Flame retardancy to IEC 60332-3-22 Category A
 - Third-party approvals from DNV-GL and ABS for safety in hazardous offshore environments
- Durability and Handling** Cables are bend-insensitive, ultra-bendable, and laser-optimized, reducing signal loss in tight bends and complex routing. They are tested for end-face quality, insertion loss, and return loss, ensuring high reliability in offshore deployments.

Pricing Overview

OM4 multimode fiber costs vary based on construction and application:

- Standard OM4 cables: \$4.50–\$5.50 per foot
- Armored or specialized offshore OM4 cables: up to \$13.50 per foot

Factors affecting price include fiber count, jacket type, and factory termination. Pre-terminated assemblies can reduce installation time and overall project costs.

Summary

For offshore applications requiring guaranteed polarization and high-speed performance, armored OM4 multimode fiber provides: High bandwid...
