

Portuguese Agent for SFP Optical Switches

AI Overview

Skylane Optics and 4LAN are key Portuguese suppliers for SFP optical switches and transceivers, offering a full range of modules, technical support, and customization services.

Skylane Optics is a Portuguese company providing a comprehensive portfolio of optical transceivers, including SFP, SFP+, SFP28, and higher-capacity modules like QSFP and CFP series. They offer:

- Technical support and consulting for network integration
- Custom coding and configuration for compatibility with various network equipment
- Local stock for immediate delivery, reducing project delays
- High reliability with rigorous testing and quality assurance

Their SFP modules are suitable for corporate networks, ISPs, and metropolitan area networks (MANs), supporting speeds from 100 Mbps up to 800 Gbps. Skylan Optics also provides guidance on selecting the right transceiver for your network, ensuring minimal latency and energy-efficient operation.

4LAN specializes in high-quality optical solutions, including SFP, SFP+, QSFP28, and DWDM modules. They provide:

- Passive and active optical components
- Optical switches and amplifiers (EDFA)
- Modules for 100G DWDM PAM4 and other high-speed applications

4LAN focuses on enterprise and data center networks, offering products compatible with major vendors and supporting long-distance, high-speed optical transmission.

Additional Options Other international suppliers like FlexOptix and Advantech also provide SFP transceivers compatible with multiple switch brands. While not exclusively Portuguese, they can ship to Portugal and offer technical support for integration with existing infrastructure.

Recommendation For a local Portuguese agent, Skylan Optics is the most comprehensive option due to their local presence, technical support, and customization services. 4LAN is also a strong choice for high-speed and DWDM opti...
