

Price of 90mm Parallel Elbow for Cable Tray

AI Overview

The price of a 90mm parallel elbow for a cable tray typically ranges from \$5 to \$25 per piece, depending on material, finish, and supplier. Factors Affecting Price

Material: Elbows are commonly made from galvanized steel, stainless steel (304/316), aluminum, or PVC. Stainless steel is more expensive due to corrosion resistance, while galvanized steel is cost-effective for general use.

Compliance and Standards: Elbows that meet NEMA VE 1/VE 2, UL 2043, or IEC 61537 standards may cost more due to testing and certification requirements.

Load Capacity and Dimensions: The elbow must match the width, depth, and side height of your existing cable tray. Higher load-bearing elbows or those with larger dimensions generally cost more.

Supplier and Bulk Orders: Prices vary by supplier. Wholesale or bulk orders from platforms like Alibaba or Made-in-China can reduce unit cost, while local distributors may charge more for smaller quantities.

Additional Features: Coatings, fireproofing, or specialized finishes can increase the price. For example, fire-resistant or powder-coated elbows are typically higher in cost.

Typical Price Range

Material	Price Range (per piece)
Galvanized steel 90mm elbow	\$5-\$12
Stainless steel 90mm elbow	\$12-\$25
PVC or aluminum 90mm elbow	\$6-\$18

For precise pricing, it is recommended to request a quote from suppliers such as Alibaba, Made-in-China, or local distributors, specifying the material, finish, and quantity required.

Recommendation

When purchasing, consider total cost of ownership, including durability, ease of installation, and maintenance, rather than just the initial price. A slightly higher-quality elbow may reduce replacement and labor costs over time.
