

Price of Construction Site Distribution Box Manufacturing Equipment

AI Overview

Automatic distribution box production lines typically range from \$50,000 to \$200,000 depending on specifications, capacity, and material compatibility.

Overview of Equipment Construction site distribution box manufacturing equipment includes automatic production lines designed for forming, bending, punching, and assembling electrical enclosures. These lines handle materials such as galvanized steel, stainless steel, and cold-rolled coils with thicknesses from 1.0 to 1.5 mm and widths up to 450 mm. The production process generally involves uncoiling, straightening, hydraulic pre-punching, roll forming, bending, and manual packing.

Production Capacity and Specifications

- Box dimensions: Height adjustable 300–1200 mm, depth 160–400 mm
- Production speed: 2–3 enclosures per minute, depending on product specifications
- Material handling: Supports steel coils up to 3 tons, with inner diameters 360–510 mm and outer diameters up to 1250 mm
- Automation: Includes servo feeders, hydraulic devices, guide systems, and bending machines for precise fabrication

Price Factors

The cost of a production line depends on:

- Automation level:** Fully automatic lines are more expensive than semi-automatic setups.
- Material compatibility:** Lines capable of handling stainless steel or thicker coils cost more.
- Production capacity:** Higher throughput lines increase the price.
- Customization:** Adjustable dimensions, integrated monitoring, and specialized punching or bending features add to the cost.
- Brand and supplier:** Established manufacturers may charge a premium for reliability, safety certifications, and after-sales support.

Estimated Price Range

Based on industry standards and specifications from suppliers:

- Entry-level automatic lines:** Around \$50,000–\$80,000, suitable for small-scale production.
- Mid-range lines:** \$80,000–\$150,000, offering higher speed, flexibility, and material options.
- High-end...**
