

Price of Explosion-proof Distribution Box Connectors

AI Overview

Explosion-proof connectors for industrial distribution boxes typically range from \$50 to over \$500 per unit, depending on type, current rating, and certification. Price Range and Factors The cost of explosion-proof connectors varies widely based on several factors: Type and Function: Simple power or signal connectors start around \$50-\$100, while high-current or multi-pin connectors with integrated load-break switches can exceed \$500 per unit. Certification: Connectors certified for ATEX, IECEx, or Class I/II Division 1 hazardous areas generally cost more due to compliance testing and safety features. Current and Voltage Rating: Higher amperage (e.g., 100-680A) or high-voltage connectors (up to 1,500V) are priced higher. Material and Durability: Stainless steel or corrosion-resistant housings for harsh environments increase the price. Supplier and Brand: Market-leading brands like Marechal, CEAG, Amphenol, and Appleton often command premium pricing due to reliability and warranty support. Typical Applications These connectors are used in factory distribution boxes, mobile machinery, portable plant equipment, offshore units, and hazardous area control panels. They ensure safe power distribution in Zone 1/2 gas or Zone 21/22 dust hazardous areas. Where to Purchase PEI-Genesis offers a wide range of explosion-proof connectors for power, control, and instrumentation systems with fast delivery. Thorne & Derrick International stocks ATEX-certified plugs, sockets, and decontactors suitable for industrial hazardous areas. R. STAHL provides versatile plugs and connectors for worldwide use in explosive atmospheres. ATEX Global lists junction boxes, terminals, and connectors compliant with ATEX 94/9/EC Directive. For exact pricing, it is recommended to contact suppliers directly with your specifications, including current rating, voltage, number of pins, and hazardous area classification,...
