

Price of Molded Cable Trays in the Netherlands

AI Overview

Molded cable trays in the Netherlands typically range from €20 to €150 per meter, depending on material, size, and specifications.

Price Overview

The cost of molded cable trays varies widely based on material, dimensions, and application requirements. Standard factors influencing price include:

- Material:** Fiberglass or molded plastic trays are generally more expensive than standard galvanized steel trays due to corrosion resistance and durability. Stainless steel trays, for example, are premium products designed for harsh environments and can cost significantly more per meter.
- Size and Load Capacity:** Wider or taller trays that support heavier cable loads increase the cost. Typical widths range from 25 mm to 600 mm, and heights from 25 mm to 125 mm.
- Special Features:** Fire-resistant coatings, powder coating, or hot-dip galvanization add to the price. Custom dimensions or patented locking systems also increase costs.
- Supplier and Sales Channel:** Direct sales to large EPC contractors may offer volume discounts, while purchases through distributors or wholesalers may include additional margins.

Estimated Cost Range

- Standard molded plastic/fiberglass trays: €50–€150 per meter
- Basic galvanized steel trays: €20–€60 per meter
- Stainless steel or specialized trays: €100–€150+ per meter, depending on corrosion resistance and custom features

Additional Considerations

- Market Volatility:** Prices are influenced by global steel and aluminum costs, energy prices, and supply chain factors.
- Customization:** Custom lengths, widths, or integrated cable management features may require direct quotes from suppliers.
- Local Suppliers:** The Netherlands has a robust network of cable tray manufacturers and distributors, including DAMEN SHIPYARDS GORINCHEM and other specialized suppliers, which can provide tailored pricing and delivery options.
