

Price of a British Metallurgical Spectrometer

AI Overview

The price of a British metallurgical spectrometer typically ranges from £10,000 to over £300,000 depending on model, condition, and included features.

Price Overview

New Spectrometers: High-end metallurgical spectrometers from UK suppliers or manufacturers can cost £100,000 to £300,000, depending on the model, automation level, and analytical capabilities.

Used or Refurbished Models: Used spectrometers are available at significantly lower prices, often ranging from £10,000 to £100,000, depending on age, condition, and included accessories.

Average Market Price: Based on listings in the UK, the average price for mass spectrometers, which include metallurgical types, is around £37,000.

Factors Affecting Price

Model and Technology: Advanced models with features like automated sample handling, high-resolution detectors, or integrated software for metallurgical analysis are more expensive.

Condition: New instruments command premium prices, while used or refurbished units are more affordable but may require maintenance or missing components.

Accessories and Software: Complete systems with sample preparation tools, calibration kits, and software licenses increase the overall cost.

Supplier and Warranty: Prices vary between direct manufacturers, specialized UK distributors, and online marketplaces. Warranty and service agreements can also affect pricing.

Where to Buy

Specialized UK Suppliers: Companies like Spectrographic Ltd provide metallurgical spectrometers and related equipment with full support and customization options.

Online Marketplaces: Platforms such as Machinesseeker, LabX, eBay UK, and Bimedis list both new and used spectrometers with prices and specifications.

In summary, a British metallurgical spectrometer can cost anywhere from £10,000 for a used basic model to over £300,000 for a fully automated, high-e...
