

Price of a standard KVM switcher

AI Overview

KVM switchers typically range from around €60 to over €500, depending on features, number of ports, and video support. Price Overview Basic desktop KVM switches for 2–4 computers with standard VGA or HDMI support usually start at €60–€100 and are suitable for home or small office setups. Mid-range models with multiple ports (4–8), USB sharing, dual-monitor support, or higher video resolutions (1080p or 4K) generally cost €150–€300. Professional or IP-based KVM switches designed for server rooms, remote access, or rack-mounted setups can exceed €500, especially when supporting multiple monitors, 4K/8K resolutions, or advanced USB3.2 connectivity.

Factors Affecting Price

- Number of Ports: More ports allow control of additional computers, increasing cost.
- Video Resolution: Support for 4K or dual-monitor setups is more expensive than standard VGA or HDMI.
- Connectivity Type: USB-C, USB3.2, or IP-based remote access adds to the price.
- Form Factor: Rack-mounted switches for professional environments are pricier than desktop models.
- Additional Features: On-screen display (OSD), hotkey switching, and audio support can increase cost.

Buying Tips

- Determine the number of computers you need to control.
- Check compatibility with your monitors and peripherals.
- Consider whether remote access or dual-monitor support is necessary.
- Compare prices across retailers like Amazon, Alternate, and specialized KVM suppliers to find the best deal.

Overall, a simple home-use KVM switch can be purchased for under €100, while professional setups for server management or high-resolution displays may cost several hundred euros.
