

Price of cable tray and hanger components

AI Overview

Cable tray systems and their hanger components typically range from a few dollars for small brackets to over \$100 for larger trays and specialized fittings, with supports and hangers accounting for 20–30% of total installed costs.

Cable Tray Costs The price of cable trays depends on the material, size, and type:

- Steel Ladder Trays:** Moderate material cost, low labor cost, total installed cost is generally the second most economical option per 100 meters.
- Wire Mesh/Basket Trays:** Low material cost, very low labor cost, ideal for light cables and data centers, starting as low as \$26–\$100 for small sections.
- Aluminum Trays:** Higher material cost but lightweight, reducing hanger requirements; prices vary depending on length and width.
- Stainless Steel Trays:** Highest cost, used in hygienic or corrosive environments like food plants or coastal areas.

Hanger and Support Components Hangers, brackets, and supports are essential for suspending trays and account for 20–30% of the total system cost.

Common components include:

- Trapeze Hangers:** Pre-galvanized steel or aluminum, used for ceiling suspension, prices vary by length and load capacity.
- Center Hangers and L-Brackets:** Used for wall or ceiling mounting, pre-galvanized or hot-dip galvanized for indoor/outdoor use.
- Threaded Rods, Cross Arms, and Support Brackets:** Facilitate tray suspension and alignment, often sold in packages of 25–50 pieces.
- Fittings and Accessories:** Elbows, tees, reducers, covers, and splice plates allow directional changes, width adjustments, and cable protection; prices vary widely depending on size and material.

Material Considerations

- Pre-Galvanized Steel (PG):** Most affordable, suitable for dry indoor environments.
- Hot-Dip Galvanized Steel (HDG):** More expensive, ideal for outdoor or industrial environments.
- Aluminum:** Lightweight, reduces labor and hanger costs, moderately expensive.
- Stainless Steel...**
