

Price of electrical distribution boxes and wiring at Bhutanese construction sites

AI Overview

Electrical distribution boxes for construction sites in Bhutan typically range from \$50 to \$500 per unit, depending on type, capacity, and features, while wiring costs vary based on material and installation requirements.

Distribution Boxes Construction site distribution boxes in Bhutan can include standard, pre-wired, and explosion-proof types. Standard boxes for temporary site power are usually made of thermoplastic or sheet steel, with IP ratings from IP65 to IP67 for dust and water resistance. Explosion-proof or heavy-duty metal boxes are more expensive due to special sealing, stacking capability, and durability, with bulk orders often reducing per-unit cost. Typical price ranges are:

- Basic pre-wired boxes: \$50–\$150 per unit
- Medium-duty metal or technopolymer boxes: \$150–\$300 per unit
- Explosion-proof or high-capacity boxes: \$300–\$500 per unit, depending on size and features

Wiring Costs Wiring costs depend on cable type, gauge, and installation complexity. Common construction site wiring includes PVC-insulated copper cables for temporary power distribution. Approximate costs:

- PVC copper wiring (1.5–4 mm²): \$0.50–\$1.50 per meter
- Heavier-duty cables (6–16 mm²): \$2–\$5 per meter

Installation labor: \$0.50–\$2 per meter, depending on site conditions and Bhutanese labor rates

Factors Affecting Costs

- Import vs. local supply:** Imported boxes may cost more due to shipping and customs.
- Quantity:** Bulk purchases reduce per-unit cost.
- Site requirements:** Outdoor or high-risk sites require higher IP-rated or explosion-proof boxes.
- Reusability:** Pre-wired modular boxes can be reused across projects, reducing long-term costs.

For accurate pricing, it is recommended to contact local suppliers or wholesalers in Bhutan who can provide quotes based on project size, box type, and wiring specifications. This overview provides a general cost framework for budgeting electrical distribution and wiring a...
