

Price of flame-retardant cable trays in China and Africa

AI Overview

Flame-retardant and fire-resistant cable trays in China typically range from \$15 to \$50 per meter depending on material and specifications, with similar products exported to Africa at slightly higher costs due to shipping and import duties. Pricing in China In China, manufacturers such as Shandong Xuanlin Metal Materials Co., Ltd. offer customizable flame-retardant and fire-resistant cable trays with finishes including HDG, pre-galvanized, powder-coated, and stainless steel 304/316, tailored to industrial requirements. Prices for standard powder-coated or galvanized trays generally start around \$15–\$25 per meter for basic models, while premium stainless steel or custom-designed trays can reach \$40–\$50 per meter depending on length, width, and load capacity. Trade terms commonly include FOB, CIF, DDU, and DDP, allowing buyers to calculate total landed costs for export. Pricing in Africa For African markets, Chinese suppliers export cable trays to countries across the continent. The CIF or DDP prices in Africa are typically 10–20% higher than domestic Chinese prices due to shipping, customs duties, and local taxes. For example, a \$20 per meter tray in China may cost \$22–\$24 per meter delivered to major ports in Africa. Local distributors may add further markups depending on demand and installation services. Factors Affecting Price

Material Type: Aluminum and stainless steel trays are more expensive than galvanized steel or powder-coated options.

Fire-Resistance Rating: Trays designed to meet higher fire safety standards (e.g., IEC 60331, BS 6387) or with intumescent coatings cost more.

Customization: Special lengths, widths, or perforation patterns increase cost.

Volume: Bulk orders reduce per-meter cost, especially for large industrial projects.

Shipping and Import Fees: Export to Africa adds freight, insurance, and customs duties, influencing final price.
