

Price of one meter of eight-core optical fiber cable

AI Overview

The cost of a standard 8-core optical fiber cable typically ranges from \$0.30 to \$2.50 per meter, depending on fiber type, construction, and environmental rating.

Price Range and Factors

For bulk purchases of standard 8-core fiber cables:

- Single-mode (OS2):** Approximately \$0.30 to \$1.50 per meter for standard indoor or outdoor cables, with higher-end prices for premium glass or specialized jackets (LSZH, armored).
- Multimode (OM3/OM4):** Typically \$0.50 to \$2.50 per meter, reflecting the higher manufacturing cost of wider cores and tighter tolerances.
- Armored or harsh-environment cables:** Prices can increase by 20–50%, reaching up to \$3 per meter for steel-tape armored or direct-burial rated cables.
- Indoor vs outdoor:** Indoor PVC or LSZH jackets are cheaper, while outdoor PE or UV-resistant jackets add to the cost.

Additional Considerations

- Fiber count:** Higher strand counts increase cost proportionally. An 8-core cable is moderately priced compared to 12-core or 24-core cables.
- Pre-terminated assemblies:** Factory-terminated cables cost more than bulk cable purchased for on-site termination, sometimes 20–30% higher.
- Installation:** The quoted per-meter cost above is for the cable material only. Installation, splicing, and connectors add additional expenses.

Summary

For a standard 8-core optical fiber cable, expect \$0.30–\$2.50 per meter depending on whether it is single-mode or multimode, indoor or outdoor, and whether it includes armor or specialized jackets. Bulk purchases and generic glass cores are at the lower end, while premium materials and environmental protection increase the price.
