

Price of outdoor cabinet constant temperature equipment

AI Overview

Outdoor cabinet constant temperature equipment typically ranges from \$1,000 to \$10,000 or more, depending on cooling capacity, features, and customization. Price Overview The cost of outdoor cabinet constant temperature equipment varies widely based on cooling capacity, IP protection rating, and additional features. For example, industrial air conditioners designed for communication cabinets or energy storage systems can range from 1 kW to over 70 kW, with prices increasing for higher capacity units and advanced features like remote monitoring, precise temperature control, and IP65-rated enclosures (Cooltechx) . Smaller units for telecom or 5G outdoor cabinets may start around \$1,000–\$2,500, while larger, high-precision systems for data centers or battery energy storage can exceed \$10,000 per unit . Many suppliers, such as Cooltechx and Alibaba vendors, offer customized solutions, which can affect the final price depending on the required temperature range, humidity control, and installation type . Factors Affecting Price Cooling Capacity: Units range from 300 W to 70 kW+, with higher capacity units costing significantly more . IP Rating: Outdoor-rated cabinets (IP55/IP65) designed for harsh environments are more expensive due to enhanced protection against dust and water . Customization: Features like remote monitoring, digital control, and integration with energy storage or telecom systems can increase costs . Delivery and Installation: Lead times vary from 10–35 days depending on order size and customization, and installation services may add to the total cost . Market Context The demand for outdoor cabinet temperature control equipment is growing due to 5G networks, IoT deployments, and edge computing, which require reliable thermal management in remote or harsh environments . Energy-efficient and smart cooling solutions are increasingly preferred...
