

Price of professional molded cable trays in Qatar

AI Overview

Custom molded cable trays in Qatar typically range from QAR 200 to QAR 800 per meter, depending on material, size, and complexity.

Overview Molded cable trays, especially FRP (Fiber Reinforced Plastic) trays, are widely used in Qatar for industrial, commercial, and infrastructure projects due to their lightweight, corrosion resistance, fire resistance, and electrical insulation properties. Suppliers like SV Composites, Electra, and Adastra WLL offer customization options to meet specific project requirements, including tray dimensions, load capacity, and environmental protection.

Factors Affecting Cost

- Material Type:** FRP trays are generally more expensive than standard steel or galvanized trays due to their durability and corrosion resistance.
- Tray Size and Load Capacity:** Wider or deeper trays designed to carry heavy power cables cost more. Ladder-type or trough-type trays with covers are priced higher than simple perforated trays.
- Customization Complexity:** Custom bends, reducers, tees, and cross-sections increase manufacturing costs. Precision molding for specific layouts or sensitive equipment adds to the price.
- Quantity and Supplier:** Bulk orders may reduce per-meter cost, while small, highly customized runs are more expensive. Local suppliers like Electra and Altura Industries provide competitive pricing and technical support.
- Environmental Requirements:** Trays for coastal, chemical, or high-temperature environments may require UV-stabilized or flame-retardant FRP, which increases cost.

Estimated Price Range

- Standard FRP molded tray: QAR 200–350 per meter
- Heavy-duty or covered FRP tray: QAR 400–600 per meter
- Highly customized or specialized trays: QAR 600–800 per meter

These prices are indicative and can vary based on supplier, project scale, and specific technical requirements.
