

Price of universal T-junction for fiber optic cable ducts

AI Overview

Universal T-junctions for fiber optic cable ducts typically range from \$20 to \$100 per unit, depending on size, material, and supplier. Overview A T-junction is used to create a 90-degree branch in fiber optic cable duct systems, allowing cables to be routed efficiently in data centers, telecom networks, or industrial installations. Common materials include PVC, mild steel, stainless steel, and aluminum, each offering different durability, corrosion resistance, and suitability for indoor or outdoor use. For example, Tripp Lite's 120 mm PVC T-junction (SRFC5JUNT) is designed for horizontal fiber routing and requires couplers sold separately to complete installation. Price Considerations PVC T-junctions: Typically \$20-\$50 per unit for standard sizes (e.g., 120 mm), suitable for indoor or light-duty applications. Mild steel or aluminum T-junctions: Prices can range from \$50-\$100 or more, depending on coating, corrosion resistance, and size. Stainless steel T-junctions: Often used in harsh environments or high-hygiene sectors, prices may exceed \$100 per unit due to durability and corrosion resistance. Additional costs may include couplers, end caps, or installation hardware, which are sometimes sold separately, as in the case of Tripp Lite's system. Where to Buy Tripp Lite / Eaton: Offers PVC T-junctions for fiber routing systems, suitable for data centers and network closets. JDPipes (UK): Supplies BT-compliant ducting and T-junctions for telecom and fiber optic networks, including green and grey PVC ducts. Alibaba: Provides a wide range of T-junctions in PVC, steel, and aluminum, often for bulk orders, with prices varying by material and quantity. Recommendation When purchasing a universal T-junction, consider: Material: PVC for standard indoor use, steel or aluminum for outdoor or heavy-duty applications. Size compatibility: Ensure the T-junction matches your duct diameter (e.g., 50-150 mm)....
