

Price quote for fireproof cable trays in Afghanistan

AI Overview

Fireproof cable trays in Afghanistan typically range from \$20 to \$100 per meter, depending on material, size, and customization.

Overview Fireproof cable trays are essential for protecting electrical cables from fire hazards and ensuring compliance with safety standards. In Afghanistan, suppliers such as Brilltech Engineers Pvt. Ltd. offer high-quality trays made from galvanized steel, stainless steel, and fiberglass, suitable for industrial and commercial installations. These trays are designed to enhance airflow, prevent overheating, and provide durable support for electrical systems.

Factors Affecting Price

- Material:** Galvanized steel is generally more affordable, while stainless steel and fiberglass trays are more expensive due to corrosion resistance and fireproofing properties.
- Size and Load Capacity:** Wider trays or those designed to carry heavier cable loads cost more.
- Customization:** Perforated, ventilated, or specially coated trays for high-temperature environments increase the price.
- Supplier and Shipping:** Local suppliers may offer competitive pricing, but imported trays can incur additional shipping and customs costs.

Estimated Price Range

- Standard galvanized fireproof trays: \$20-\$40 per meter
- Stainless steel or fiberglass fireproof trays: \$50-\$100 per meter
- Custom or heavy-duty trays: Prices may exceed \$100 per meter depending on specifications

How to Obtain Accurate Pricing

Contact local suppliers like Brilltech Engineers for a free quote tailored to your project requirements. Specify tray material, dimensions, load capacity, and any fireproofing certifications. Compare multiple suppliers to ensure competitive pricing and compliance with safety standards. By considering these factors, you can select the most suitable fireproof cable tray system for your project in Afghanistan while managing costs effectively.
